Response with respect to application No. 10/579,642, see enclosed cover letter.

Examiner Anthony, Joseph David

Mail date 07/19/2011

As suggested by Mr. Anthony, I have enclosed the extension fee for one month of \$65.00 small entity.

Under Election/restrictions I choose Group 1, claims 1-9 and 12.

I also add that the syrup claimed in this application was not discovered in earlier patent (US 7138443). Heat was applied in that work which very quickly reduces molecular weight of polyphosphoric acid which destroys the formation of syrup. My patent attorney of that time said I did not have to disclose the reason that I did not observe syrup formation in first patent.

Yours truly,

Robert Kasowski
